Important: Safety information about video games

About photosensitive seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause photosensitive epileptic seizures while watching video games. These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Adults who allow teenagers (or children) to play the games should watch for or ask their children about these symptoms as they are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by playing in a well-lit room and by not playing when you are drowsy or fatigued. If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

Play safely

Take a break from playing games at least every half hour. Stop playing immediately if you begin to feel tired or if you experience an unpleasant sensation or pain in your hands and/or arms. If the condition persists, consult a doctor. Use of vibration can aggravate injuries. Do not turn vibration on if you have any ailment in the bones or joints of your fingers, hands, wrists, or arms.

CARE AND MAINTENANCE

Your game card and game deck are products of superior design and craftsmanship and should be treated with care. The suggestions below will help you protect your warranty coverage and enjoy your game for many years.

- Keep the game card and game deck dry. Precipitation, humidity and all types of liquids or moisture can contain minerals that will corrode electronic circuits.
- Do not use or store the game card and game deck in dusty, dirty areas.
- Do not store the game card and game deck in hot areas.
- Do not store the game card and game deck in cold areas. When the game deck returns to its normal temperature, moisture can form inside the game deck and damage electronic circuit boards.
- Do not attempt to open the game card or game deck other than as instructed in the user guide.
- Do not drop, knock, or shake the game card and game deck.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the game card or game deck.
- Keep the game card out of the reach of small children.

All of the above suggestions apply equally to your game card, game deck, and any enhancement.

TIME TRIAL

Time Trial is a single-player mode where you race against your own best times on any of the tracks in the game. There are no opponents to slow you down and no Power-ups to help you out. In a Time Trial, you race to get the best time for three laps around the track. After completing a race, your ghost will become available to race against. Use this feature to challenge yourself to improve!

ARCADE QUICK RACE

Choose Quick Race to randomly select a track and character for a super quick race!

ARCADE SINGLE RACE

Choose a track and race it—instant action!

ARCADE CUP RACE

Compete against other racers on three different tracks to get the most points. At the end of each race, points are assigned as follows:

Placement Scoring

- 1st place **9 points**
- 2nd place **6 points**
- 3rd place **3 points**
- 4th place **1 point**

Anyone finishing after fourth gets zilch!

At the end of the three races, the player with the most points wins the cup. You can play this mode on your own or against friends in Bluetooth Multiplayer Game Play.

- Wumpa Cup:** Terra 1, Barin 2, Fenomena 3
- Nitro Cup:** Barin 1, Fenomena 2, Teknee 3
- Crash Cup:** Terra 3, Fenomena 1, Teknee 2

**Vs SINGLE RACE**

Vs WUMPA RACE

(Bluetooth® Multiplayer Game Play only)

The object of the mode is to be the first to cross the finish line with 20 Wumpa! Race against your friends to collect the Wumpa fruit scattered around the track. There is no lap limit in this mode—you race until the first player crosses the finish line with 20 Wumpa.

BATTLE MODES

Speed around battle arenas collecting weapons and attacking your enemies. You get a point every time you damage an opponent, and you lose a point every time you get hit by a hazard or Power-up. There are two Battle modes in Crash Nitro Kart.

ADVENTURE MODE

TO START A NEW ADVENTURE:

1. Highlight Single Player on the Main Menu and press **Key 5**.
2. Highlight Adventure and press **Key 5**.
3. Highlight an empty slot and press **Key 5**.
To change slots, press **Controller Key Up** or **Down**.
4. Select your team by pressing **Controller Key Up** or **Down** and pressing **Key 5**.
5. Choose a character from that team by pressing **Controller Key Up** or **Down** and pressing **Key 5**. Enter a name for your save slot. Use **Controller Key** to highlight a letter or number, and hit **Key 5** to enter your selection. When you are done, highlight the "Checkmark" and press **Key 5**.
6. After the introductory story plays, you will appear in the Terra Hub World. Drive onto an active warp pad to start your adventure!

Note: During Adventure mode, you will be able to change characters on your team in the Garage, which is available from the Hub World Pause Menu.

HUB WORLD

When starting a new Adventure or loading a saved one, you will be placed in a Hub World level. Here you will find warp pads that will take you to tracks containing various race types where you can prove your stuff! Active warp pads will be glowing, while inactive ones will not. All you need to do is drive onto any active warp pad to start a race! Take advantage of your time in the Hub World by familiarizing yourself with how your kart handles. One main Hub and four other Hub Worlds will become available to you as you progress through the game.

Note: A map of the current Hub World will be displayed in the lower right corner of the screen. Glowing blue dots indicate available warp pads. Yellow dots are warp pads to other Hub Worlds. The blinking green triangle displays your current location.

TROPHY RACE

The heart of Adventure progression in Crash Nitro Kart is the Trophy Race. You must win trophies to activate other warp pads and unlock other race types. So practice those racing skills!

BOSS KEY RACE

After winning all three trophies in a world, you will have the chance to race against that world's champion. If you win the race, you will be awarded a key that will open another Hub World containing even more tracks and races!

CRYSTAL ARENA

Each world contains a Crystal Arena level. On these special levels you need to collect all of the crystals within a time limit. If you do, you will be awarded a Purple token! You'll have to drive fast!

RELIC RACE

After winning a Trophy Race, you will be able to go back to the various tracks of that world and race in a Relic Race. You race alone in a Relic Race, and the object is to finish in the shortest time possible. Time crates will be scattered throughout the course. Smash these crates and the clock will stop for 1, 2, or 3 seconds (as shown on the side of the crates)! If you race fast enough, you might be awarded a Sapphire Relic. If you drive even faster, you could get a Gold Relic. Or you just might be fast enough to win a Platinum Relic! So good luck and drive fast!

CNK CHALLENGE

After winning a Boss Key Race, you will be able to go back and race in a CNK Challenge on the various tracks of the world. The letters C, N, and K will be placed around the track. To be awarded a CNK token, collect all three of the letters and finish the race in first place!

GARAGE

The Garage is available from the Hub World Pause Menu. Here you will be able to track your progress through the game or change your character to another team member.

AKU AKU/UKA UKA HINTS

When you are in the Hub World, Aku Aku or Uka Uka will stop by to give you tips and hints on how to play the game more effectively. If you would like to review them later, you may do so from the Hub World Pause Menu. To do this, press **Left** or **Right Selection Key** while in the Hub World, highlight **HINTS**, and press **Key 5**. Pressing **Controller Key Up** and **Down** will change the active hint. Press **Key 5** to view the selected hint.

Caution: This removes all Crash Nitro Kart data from the N-Gage game deck. Deleting all game data will also cause the game to Quit.

POWER-UPS

Pick up these Power-ups and weapons by driving over the boxes with question marks on them.

TURBO BOOSTS A free bottle of boost! Use this item to get an extra boost of speed and zip ahead of your opponents or out of the way of a missile.

Juiced — Get an even longer and bigger boost.

BOWLING BOMBS When Velo goes bowling, he doesn't fool around! These bombs shoot out from your kart in a straight line until they explode against a wall or, with luck, another kart! If your aim is a little off, you can detonate the bomb remotely when it's next to your target. To do this, just press **Power-up Key** again. If there's a kart (or missile) on your tail, hold **Controller Key Down** and press **Power-up Key** to shoot the bomb backwards.

Juiced — The bomb moves faster and the explosion radius is even bigger.

HOMING MISSILES These lock on to the nearest opponent you can see and zoom after them. They'll explode on contact and send your opponent into a killer tumble. If you see a set of crosshairs on your character, it means you've been targeted, so start dodging!

Juiced — The missile goes faster and tracks the target better.

TNT EXPLOSIVE CRATES Drop these on the track to give the racers behind you a nasty surprise. If they drive into one of these killer crates, it'll latch onto their head and start counting down. If the fuse runs out, they'll wipe out when it explodes in their face. If they jump enough times while the crate is on their head, it will come loose and fly off into the air.

Juiced — Your TNT crate will be upgraded to a green NITRO crate that explodes as soon as someone hits it.

INVINCIBILITY MASKS Activate this item to get your team mascot (Aku Aku for Team Bandicoot, Uka Uka for Team Evil) to spin around your kart

as a protective shield for a short time. While it's active, weapons and hazards can't hurt you, and any karts that you "accidentally" bump into will spin out. You'll also go slightly faster while the mask is active.

Juiced — Your mascot mask will stick around to protect you longer.

POWER SHIELDS This protective green bubble will save you from getting hit by one weapon or hazard. You can also attack your opponents with it by bumping into them while it's on or by launching it using **Power-up Key**. Once activated, it will fade away after a few seconds even if you don't use it.

Juiced – The blue juiced bubble still goes away when you hit something, but it has no time limit.

FREEZING MINES This mine will put anyone who drives over it into a giant ice cube, causing slippery steering. Put it near tight corners to cause less wary racers to get tied up.

Juiced – The ice cube will take longer to melt and will send you into a spinout.

N. TROPY CLOCKS This wicked watch will allow you to alter time and slow down every other kart on the track. When you activate it, all of your opponents will spin out and become sluggish. This is a great way to come back from behind, so take advantage of it.

Juiced – The time effect will last even longer.

TORNADO TOPS You can easily even the odds with this powerful weapon. When you release this super cyclone, it will immediately home in on whoever is in first place and catch his kart up in a mini tornado. Of course, anyone unlucky enough to get in its path will also get caught up in a tiny twister.

Juiced – A more deadly tornado top will knock out more people along the way.

INVISIBILITY

(Bluetooth® Multiplayer Game Play only)

Activate this Power-up to become invisible to all your opponents. You'll still see a ghost of yourself, but no one else in the arena will be able to see you. Great for sneak attacks.

Juiced – Stay invisible even longer.

SUPER ENGINES

(Bluetooth® Multiplayer Game Play only)

Replace the engine in your kart with something a bit more tricked out. For a short time, you'll zip around faster than any other kart in the arena. It's just the thing for outrunning speeding missiles. But the engine will run out after a few seconds, so use it or lose it!

Juiced – A little more funk in your trunk.
